Urfa	April 15
Gaziantep	April 16

Online Lectures

The courses will take place in a metaverse environment with virtual avatars

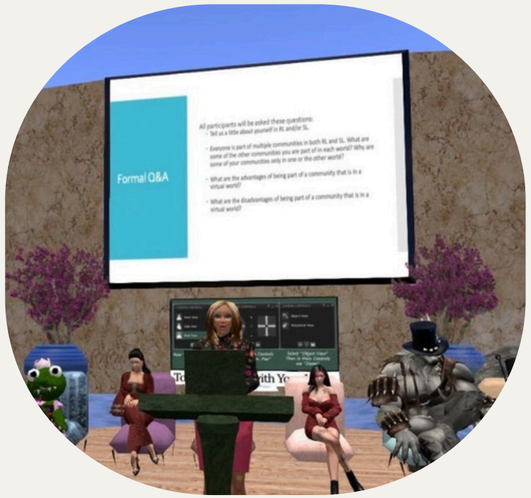

Underwater Experience

Delia Lake will guide us through an immersive underwater experience where we will explore the effects of global warming on marine life and the environment.

Metaliteracy and Digital Citizenship

Dr. Val Hill will lead a session on Metaliteracy and Digital Citizenship in digital and virtual worlds.

Virtual Ability Island

Gentle Heron will share insights into the community's mission, accessibility efforts, and support services in Second Life.

Final Presentations

Students will give presentations on the topics they have learned during this program
